Attention Farmers.

Why remain in the North and stay in doors six months in the year consuming what you raise during the other six months?

Go South where you can work out doors every month in the year, and where you are producing something the year round. If you are a stock raiser you know your stock are now "eating their heads off" and, besides, have to be protected from the rigors of winter by expensive shelter.

Economical stock feeding requires the combination of both flesh-forming and fat-forming foods in certain proportions. Alabama and Florida produce in abundance the velvet bean and cassava, the first a flesh producer, and the latter a fat producer, and they are the cheapest and best fattening materials known to the world.

More money can be made and with less labor, in general farming, fruit and berry growing and truck gardening along our road in the South than in any other section of the Union.

dinning room of the Pacific hotel last Friday evening, and notwithstanding the inclemency of the weather a very large number of hungry people were fed, which netted a neat sum for the ladies.

The Callaway hall team has re-organized for the season by electing Harvey Mahan as manager, and Edwin Conly captain. The boys expect to begin practicing in a short time, and prepare themselves to meet all comers during the summer. A game has already been matched with the Arnold boys, and will be played at this place April 30th.

It is reliably stated that numerous new buildings are booked to go up in this city this coming summer. Callaway made a good growth last year, and it is thought that the carpenters will have more than they can do this year. Building has been going on all winter, and the carpenters who desired to work have not lost many days for the past twelve months. It may be that Callaway will be a county seat yet.
